

**The pad is without doubt the most important and delicate element in the pad printing process to obtain the print of quality. There are a lot of points to consider to make a correct choice of a pad.**

The easier way is to send directly to TOSH the object that you need to print and we will choose the ideal pad for your specific application. But this is not the quickest solution.

To accelerate the choice, TOSH supply a simple catalogue, that enable the customers in finding a range of pads which most suit the need in a very quick way.

In the CD you can find the complete pads catalogue, compound of various files PDF; every file groups all the pads of same shape typology.

The single pad cards are paged in A4 format and there are two different methods to vision them: eight cards per page, for the summarizing aspect of the catalogue; or three pads per page, for picture details.

**Every value of fields of dimension are expressed in millimetres.**

It is reported the diameter of round base pads and the width/length of all of others.

For pads with particular shapes it is possible to find the quotes into the picture. The technical drawing beside shows all reported quotes in the dimension fields with letters of reference.

The height quote mentioned for every pads includes the base of support. All TOSH pads are supplied on the wooden base, those with \_ALL code are supplied on aluminium base.

In GENERAL INFORMATION file you can find all the information useful to choose the pad in a correct way regarding its shape, kind of rubber and hardness.

In case of you can not find what you need in the catalogue, TOSH is able, in a really short time, to produce mixtures with special formulas and also shapes out of standard.

**The date reported on the CD backside shows the latest up-to-date .**

**The real time updated catalogue is available on [www.tosh](http://www.tosh)**
